

VAPOR BUS DOOR EQUIPMENT

LightTouch® Actuation Bar for Exit Doors

Green:	Door Unlocked/Authorized
Yellow:	Door Open
Flashing Yellow:	Door Opening
Flashing Red:	Door Closing
Yellow Flash	
When Touched:	Touch Acknowledged / System On

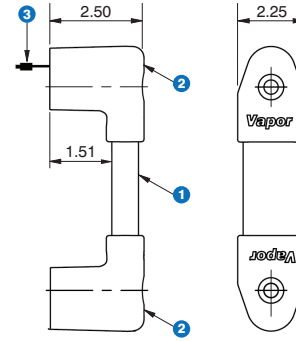

New Illuminated LightTouch Actuation Bar Indicates Exit Door Status for Convenient Passenger Egress

The Vapor LightTouch door actuation bar features exclusive solid-state sensing technology to send “Open Door” signal with no moving parts. Illuminated and flashing color-coded lights convey door status. LED lights run the length of the weather resistant, easy-grip oval bar positioning the “Green Light” function directly in front of passengers. Rugged universal mounting housings simplify installation and electrical connections. ADA compliant, the LightTouch bar meets industry strength standards and satisfies the NHTSA Drop and Drag Test. The absence of moving parts minimizes maintenance costs and eliminates annoying rattles.

- Replaces touch tape and touch bars
- Solid-state Light Curtain technology for superior reliability
- No moving parts, minimal maintenance and no rattles
- Eliminates header-mounted, green “Door Authorized” light
- Flashing lights indicate door opening or closing
- Quick-flash for convenient operational verification
- Day and night modes, brighter during day
- ADA compliant passenger assist

Vapor LightTouch® Actuation Bar for Exit Doors

Illuminates Length of Weather-Resistant Easy-Grip Oval Bar with Passenger Egress Door Status Signals

STANDARD PROFILE

Fastens to door using 5/16"-18" x 2-1/2" socket head cap screws and 5/16" lock washers. Grade 5 hardware recommended with assembly torque of 13 ft.-lbs.

- 1 – Aluminum Bar
- 2 – Universal Housing
- 3 – 4-Pin Connector

Door Activation/Assist Technology

Characteristics:

Technology	Infrared Light Curtain
Design Life	12 years
Maintenance Cycle	12 years
Operating Voltage	12 - 24VDC
Retrofit	Yes

Vapor Bus International is a leader in the design and manufacture of passenger door equipment and systems for buses, rail passenger cars and locomotives. Founded in 1903, today Vapor is the principal supplier to the major North American bus manufacturers and a subsidiary of the Wabtec Corporation and Faiveley Transport, leading global providers for the passenger transit and freight rail industries.
