

Hinged Derails

Description:

A derail is a device that will derail any railroad rolling stock, including mainline locomotives. Employees working on or around the track with nearby rolling stock, must be protected by a derail. As the flange of the train wheel comes in contact with the derail, it lifts the wheel and deflects it away from the rail head, and thus, the wheels are halted by becoming imbedded in the track ballast.

Note: Flag and Staff also sold separately.

Features:

- Covers 70-141lb Rail
- Low Deflection Angle
- No Adzing or Shimming of Ties
- Becomes Fixed Part of Track
- Sits 2-3/4" Above Railhead
- Drive Spikes included
- Padlock Available (898020-058)

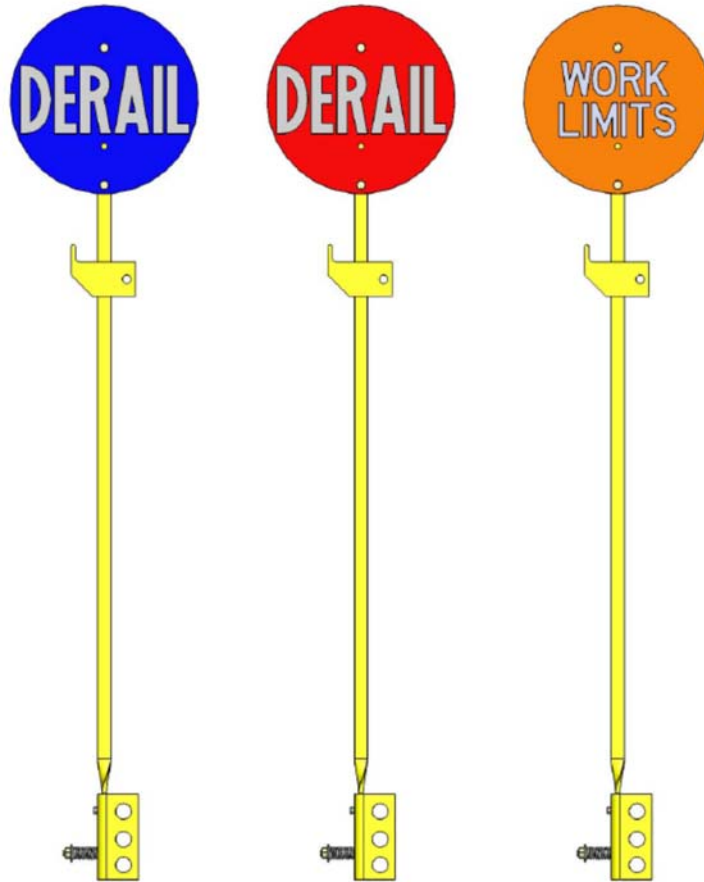

Ordering Information:

Model #	Derail Type	Flag (Color)	Fits Rail	Weight
898009-100-01L	Left Hand Throw	Derail (Blue)	70-110lb Rail	150lbs
