

# Model 953 Electric Switch Lock

## Description

The 953 Electric Switch Lock prevents unauthorized and unwarranted operation of switch stands, hand throw switch machines, derails and other devices. This is done using a plunger that is lowered into a hole in a lock rod, preventing motion of the attached devices. The unit may be electrically interlocked with the signaling system or remotely locked by the dispatcher, preventing switch operation unless traffic conditions allow safe operation.

## Features:

- Sturdy and Low Maintenance Design
- Weatherproof Construction
- Door Design Only Allows Door to Close if Switch is Locked
- “Locked & Unlocked” Banner-Style Indicator
- Available in Standard and Dwarf Heights\*

*\*Standard height model pictured*
